

## **recycle memory effort**

a free program designed with Mother Earth in mind

### **Recycle your used memory and contribute to the “greener” good.**

Are you wondering what to do with your used memory? After upgrading their computers, many people simply throw away their old memory, not realizing that its components are hazardous to our earth. That’s why we created the Recycle Memory Effort—to educate our customers and contribute to a cleaner planet. EDGE accepts donations from customers wanting to recycle their memory for the greater, “greener” good.

Send your used memory to:

EDGE TECH CORP RECYCLE DEPARTMENT  
PO BOX 2329  
ADA OK 74821-9909

Please include this card inside of your used memory packaging.

Thank you! : o)
